EDUCATION

Netaji Subhas University of Technology

B.Tech in Electronics & Communication Engineering (IoT)

2022 – 2026

New Delhi, India

EXPERIENCE

Software Developer

Apr 2026 — Present

WorkWall

Delhi, India

- Developed a **semantic candidate search engine** across **100K+ profiles** using **NLP-based intent extraction**, **Redis caching**, and **ranking optimization**, improving search relevance by **75%** and reducing response time from **8s to 1.2s**.
- Engineered and scaled an **event-driven omnichannel notification platform** processing **50K+ events/day** across **WhatsApp**, **Email** and **push notifications** using **Twilio**, **Firebase**, and **SendGrid**, reducing **P95 delivery latency** by **60%** through **async queueing** and **retry optimization**.
- Automated **end-to-end contract lifecycle workflows** using **DocuSign APIs**, **GCP schedulers**, and **backend automation services**, reducing document turnaround time from **3 days to under 2 hours** while eliminating manual operational bottlenecks.
- Collaborated closely with **product**, **operations**, and **business stakeholders** to design scalable workflow automation systems, track operational metrics and delivery reliability, and improve recruiter and candidate engagement through data-driven product iterations.

Software Developer

Dec 2025 — Mar 2026

Critical Insights India Pvt. Ltd.

Delhi, India

- Developing scalable **AI-enabled healthcare applications** in an **Agile squad environment** using **Angular**, **Spring Boot**, and **PostgreSQL**, integrating **secure REST APIs** and optimizing production-grade clinical workflows.
- Engineered a **FaceNet (ResNet-based) embedding pipeline** for face-recognition authentication, leveraging **vector similarity search** with Euclidean distance over PostgreSQL-stored embeddings for secure, low-latency identity verification.
- Designed and implemented a **real-time speech-to-text inference pipeline** for clinical documentation with intelligent buffering, silence detection, and incremental text aggregation to maintain semantic consistency across long-duration sessions.
- Integrated **LLM-powered post-processing pipelines** using **structured output prompting** to transform raw clinical transcripts into professional medical summaries while preserving critical terminology, contextual accuracy, and numeric precision.

Software Developer Intern

Jun 2025 — Aug 2025

SIS Group Enterprises

Delhi, India

- Built and deployed **15+ production React components** from **Figma** specifications, integrating **REST APIs** across **AWS S3/EC2** environments in a cross-functional team.

PROJECTS

YouTube RAG Chatbot

Python (LangChain), React, HuggingFace (Mistral), ChromaDB, Vector Embeddings, LLMs

- Built an end-to-end **Retrieval-Augmented Generation (RAG)** pipeline using **LangChain**, **HuggingFace embeddings**, and **ChromaDB** to enable **semantic retrieval** and grounded **LLM-based Q&A over YouTube transcripts**.
- Optimized retrieval accuracy through advanced **text chunking strategies**, **similarity-threshold tuning**, and **prompt engineering** techniques including **few-shot prompting** and **structured outputs**, significantly reducing **hallucinated responses**.
- Integrated a **Mistral-powered LLM chatbot** for **context-aware summarization** and query answering, applying core LLM concepts including **embeddings**, **context-window management**, and **inference parameter tuning (temperature, top-p)** while evaluating **RAG vs fine-tuning** trade-offs for dynamic content systems.

PrepAlgo AI — DSA Tracker & Interview Assistant

React, Node.js, MongoDB, Redis, LLM Microservice

- Built a **full-stack DSA preparation platform** enabling users to track **LeetCode/GFG problems**, organize **pattern-tagged** question libraries, and maintain **structured notes** with support for **multiple solution approaches** (brute force, optimized, interview-ready).
- Developed an **LLM-powered interview assistant microservice** with **Beginner**, **Practice**, and **Interview modes**, providing **guided hints**, **complexity analysis**, **debugging support**, and realistic **mock interview simulations** for algorithmic problem solving.
- Implemented **interactive dashboard analytics** including **LeetCode heatmaps**, **solved-question metrics**, **persistent chat history**, **markdown-based code rendering**, and **responsive ChatGPT-style UI/UX** optimized for technical interview preparation.

Uploadify

React, TypeScript, MongoDB, NextAuth, ImageKit, Docker

- Built a **full-stack web application** using **React** and **TypeScript** for uploading, managing, and delivering user-generated images.
- Integrated **ImageKit** for **dynamic image uploads**, real-time transformations, and optimized content delivery.
- Implemented **secure authentication and session management** using **NextAuth**, protecting routes and user data.
- Designed persistent storage using **MongoDB** and **AWS S3**, and **containerized frontend and backend services using Docker** to ensure consistent development and deployment environments.

SKILLS

Programming Languages

C++, Python, JavaScript

Web Technologies

HTML, CSS, Tailwind CSS, Angular, React, NextJS, Node.js, Spring Boot, REST API, FastAPI

Databases

PostgreSQL, MongoDB, MySQL, Vector Databases

Tools & Platforms

Git, GitHub, Cursor, AWS, Docker, GitHub Actions (CI/CD), Postman, Vercel, Figma, OLLAMA LLM

Coursework

OOPS, Operating Systems, DBMS, Machine Learning, GenAI (RAG, Agentic AI, LangChain, Transformer)

ACHIEVEMENTS

- HCL Hackathon (Nov 2025)**: Built a MERN-based healthcare portal with role-based access and secure APIs; secured a **Top 3** position.
- Adobe Hackathon (Jan 2026)**: Built an Adobe Express Add-on for automated **brand kit generation**; finished as **Runner-Up**.
